it's pretty simple i won't question what you watch on your cable and satellite tv so don't question me on what i listen to on a pay to listen radio service if the nab would improve their product maybe more people would listen to them the service that xm provides is great with out having to switch stations every 50 to 75 miles because of a poor signal and by the way when i'm at home there are a few stations i do listen to when i'm in my personal vehicle thank you for your time
